MULTI-STATION/TECHNOLOGY

ACF/FF/2 STATIONS

- 1 Forming with integrated cutting
- 2 Stacking

ACF/3 STATIONS

- 1 Forming
- 2 Cutting
- 3 Stacking

ACF/P/4 STATIONS

- 1 Forming
- 2 Punching
- 3 Cutting
- 4 Stacking

MODELS		650	820	980	980XL	980XXL
Sheet width max.	mm	680	850	1010	1010	1010

LEU

High speed thermoforming machines highly engineered with steel rule die cutting technology. The ACF series is a unique and innovative integrated system with robust modular configuration, elevated performances and high flexibility.

MACHINES ABLE TO PRODUCE:
**CONTAINERS, TRAYS, PLATES, LIDS
and FLOWERPOTS**

PROCESSED MATERIALS:
**PET, RPET, CPET, OPS, PS, PP,
PE, PVC, PLA**

SHEET **THICKNESS** : 0,2÷2 mm.
MAXIMUM PART **DEPTH**: 130 mm.

Sheet edge preheaters and
heating ovens

Description

- ▶ Designed to reduce energy consumption and deliver high performance.
- ▶ Forming with air pressure and/or vacuum.
- ▶ Exceptional repeatability and high level of standardization
- ▶ Heating oven with high efficient ceramic heaters
- ▶ Robust structure
- ▶ Flexible production for a wide range of article
- ▶ Forming, punching, and cutting presses with four posts with uniform balance of the forces on mould platens
- ▶ Cutting reliability and accuracy
- ▶ Full electric machine = reduced energy consumption

EASY
THE SMART HMI

EASY APP

MIRRORING

4.0 READY

REMOTE
ASSISTANCE

EASY the smart software

OPTIMIZES **PRODUCTIVITY** / IMPROVES **EFFICIENCY** / EASE OF **OPERATION**

- ▶ Feedback of the cycle parameters based on the set speed
- ▶ Monitor displaying of I/O PLC cards
- ▶ Auto setting of the set parameters refusing data that are not compatible with the pre-defined cycle
- ▶ Optimizes diagnostics with information for troubleshooting
- ▶ Bar chart with all functions of the automatic loop
- ▶ Energy saving system with optimization of oven heating in relation to mould size

Customization

- ▶ Fast tool change equipment, mould centering devices and power connections
- ▶ Different stacking solutions depending on your product
- ▶ Heating oven with different control zones to process different thermoplastic materials
- ▶ In-Mould Labelling automation capabilities with side entry robot
- ▶ Downstream automation for packing
- ▶ EASY LIFT system for an easy handling of the thermoformed products

STACKING ROBOT ER3X
